

## **Stracchino monoporzione**

It is a fresh cheese of superior quality, produced on our special recipe, exclusively with fresh Italian milk without dyes and without preservatives. We are particularly proud and satisfied with this product, which can also be called an "opener"; because really those who taste it take it back and buy it back. In addition to the fundamental characteristic of the quality, it has other advantages that make it interesting, namely the smallest format of the classic stracchino that is on the market, in fact the pieces are cut and wrapped by hand, and it also has a beautiful graphic design that makes it attractive and clearly visible to the consumer.
